SWITCHES SOCKETS FRAMES

The Z-SWITCH range of electric wall fittings allows you to mix and match elements to your own style. Stay unique and stylish, choose from drawn aluminium, glass or polycarbonate frames and place the switches or sockets you like. Our range can be divided into two broad categories: the RockMe classic mechanical switch range and TouchMe touch panel switches. In addition to switches, an outstanding range of connectors is also available. Whether it is a 230V wall socket, power, multimedia or USB sockets, they are all part of our portfolio. The fittings are available from 1 to 5.

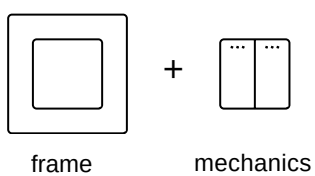

TRADITIONAL SWITCHES

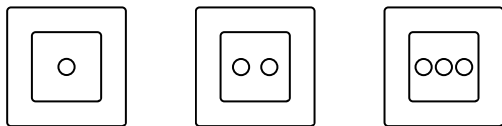

Our traditional switches range from the common types to three-button single pole and toggle switches. The switch inserts contain the enclosures and their electrical connection corresponds to the wiring commonly used in Europe.

ASSOCIATES:

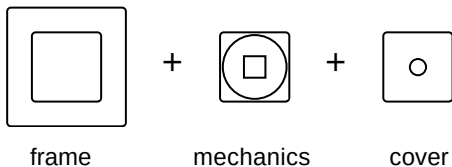

TOUCH SWITCHES

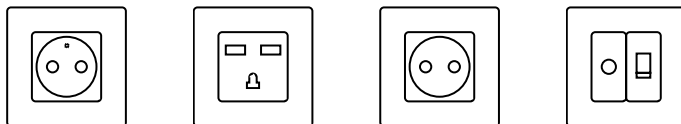

Our touch switches include the common functions, but their wiring is minimally different from conventional switches. Two strands of wire are needed between the toggle switches and no cross-over switches are required, as the number of toggle switches in a circuit can be unlimited. The switches are equipped with an indicator light source.

ASSOCIATES:

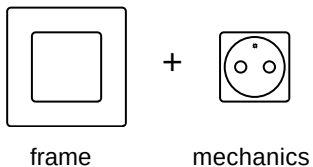

SOCKETS

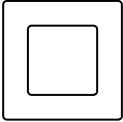

Sockets include the general types, but also special sockets such as ungrounded sockets, French sockets and universal sockets. There are also 1 module wide sockets available, which can be 2 pcs per place.

METAL SERIES

Brushed aluminium surface

Our brushed metal frames are available in three colours with an elegant, beautiful finish, carefully crafted with a sophisticated polish. The frames come with a so-called fixing frame, which can be fixed to the wall with screws. The fittings can be easily snapped into the fixing frame and the frame can be easily snapped onto it. The frames can be used both horizontally and vertically.

GLASS SERIES

Coloured tempered glass surface

Our glass frames are available in four colours with an elegant, glossy finish and carefully crafted, sophisticated polishing. The frames come with a so-called fixing frame, which can be fixed to the wall with screws. The fittings can be easily snapped into the fixing frame and the frame can be easily snapped onto it. The frames can be used both horizontally and vertically.

PLASTIC SERIES

Durable polycarbonate material

Our polycarbonate frames are available in four colours in a stylish, durable flexible design. The frames come with a so-called fixing frame, which can be fixed to the wall with screws. The fittings can be easily attached to the fixing frame and then the frame can be easily attached by simply snapping it on. The frames can be used both horizontally and vertically.

Curtain switch N105	B0550	12 490 Ft

Double 2-way switches work differently from conventional switches! In all cases, the buttons of the linked switches communicate with each other, i.e. the lamps connected to the switches are controlled by the buttons of each switch according to the output points. It is not possible to switch more than 2 lamps or groups of lamps. The number of single and double alternative switches may be unlimited! For dimmers the maximum LED light source load is 80W"

TOUCH SWITCH COVERS

	Black	White	Gold	Gray	Consumer price
Glass cover 1	B0090	W0090	G0090	R0090	1490 Ft
